

This proposed rulemaking would be devastating to the small markets radio stations. The additional resources would be very costly and many stations would go in to bankruptcy. We would have to let go on air personell to be replaced with someone to record all day. It would be a total mess with loss of listeners, loss of income and most likely less service for the community. A better idea would be if someone violate the law then they could be punished by making them record all programs for a number of months.

As far as your proposed rule making I am totaly against it.
